

526-H | Handicraft scissors

ARS's unique "micro-edge" treatment produces microscopic waves on the edge of the blades to secure the material firmly at the shearing point. The blade is deliberately curved to be able to hold the cloth firmly and cut it efficiently at every part of the blade from the fulcrum to the tip. The 526H was designed specifically for aramid base fabrics, such as Kevlar. They assure excellent durability against cutting aramid based fabrics, high molecular film, and other general fabric. The tool life is extremely high due to its hardness of 1300 HV (approx. 72 HRC). The 526H shears have demonstrated a cutting durability more than 100 times that of ordinary steel shears!

SKU:

ARS526-H

Weight:

260 gram

Length:

260 mm

EAN code:

4965280851000
